~~"Industrial Hemp-~~North Carolina Hemp Commission.

"§ 106-568.50. Legislative findings and purpose.

~~The General Assembly finds and declares that it is in the best interest of the citizens of North Carolina to promote and encourage the development of an industrial hemp industry in the State in order to expand employment, promote economic activity, and provide opportunities to small farmers for an environmentally sustainable and profitable use of crop lands that might otherwise be lost to agricultural production. The purposes of this Article are to establish an agricultural pilot program for the cultivation of industrial hemp in the State, to provide for reporting on the program by growers and processors for agricultural or other research, and to pursue any federal permits or waivers necessary to allow industrial hemp to be grown in the State.~~

The General Assembly finds and declares that hemp is a viable agriculture commodity in this State and that it is in the best interest of the citizens of North Carolina to:

- (1) Promote the cultivation and processing of hemp, and open new commercial markets for farmers and businesses through the sale of hemp products.
- (2) Promote the expansion of the State's hemp industry to the maximum extent permitted by law, allowing farmers and businesses to cultivate, handle, and process hemp and sell hemp products for commercial purposes.
